Key Skills

HTML5, CSS3, JavaScript (ES6+), React, Next.js, Material-UI, Framer Motion, GSAP, Node.js, Express, MongoDB, SQL Tools and Technologies: Git, GitHub, Docker, PyQt6 Designer.

Soft Skills

Root Cause Analysis, teamwork, communication, flexibility.

PROFESIONAL EXPERIENCE

Front-End Developer

Freelance

Belagavi, Karnataka, India

August 2024 – Present

- Launched and maintained scalable web applications using Next.js, React, and TypeScript, enhancing modularity and reusability of components, which reduced development time by 30%.
- Executed responsive design and accessibility features, ensuring compatibility with 5+ device types and achieving a better user experience and broader reach.
- Integrated Stripe for secure payment processing in the online food ordering platform, which streamlined transactions and reduced cart abandonment by 25% through a simplified checkout process.
- Optimized website performance by leveraging server-side rendering, code splitting, and caching strategies, resulting in a 35% decrease in page load times

Full-Stack Developer

Freelance

Belagavi, Karnataka, India

June 2024

- Led the development of Quil-Quest, a scalable blog platform using Next.js, featuring secure user authentication and server-side rendering.
- Improved SEO and enhanced load times by 30%. Implemented features such as user registration, post creation, and interactive content management, supporting over 100+ active users.
- The THM Inventory and Billing System, automating key processes such as inventory tracking and billing, resulting in a 35% increase in operational efficiency. Reduced manual errors by 40% and streamlined transaction processing, handling over 1,000 products and 200 transactions daily.
- Utilized Node.js, Express, and MongoDB for backend development, ensuring seamless data management and high application performance. Built RESTful APIs to handle complex data operations efficiently, leading to a 25% reduction in server response time and robust data handling for multiple users.

Education

Bachelor of Science in Computer Science

KLS GIT, Belagavi, Karnataka, India

Expected Graduation: 2026

CGPA: 8.7

Certifications & Training

- Front-End Development Certification (Online Course)
- Full-Stack Development Bootcamp (Online Course)

Projects

Quil-Quest

Next.js

- Devised a blog platform with secure authentication and responsive design.
- Increased user engagement by 20% through performance optimization.

Relish

Next.js, Stripe

- Built an online food ordering platform using Next.js and Stripe.
- Processed over **100 transactions** daily, achieving a **20%** reduction in cart abandonment.
- Designed a responsive interface compatible with **5+ device types**.
- Optimized real-time tracking, enhancing the user experience.
- Achieved a **30%** faster load time through server-side rendering.

THM – Inventory management

Python, Pyqt6

- Engineered a standalone system for THM to manage inventory for over **1,000 products** daily.
- Processed up to **200 transactions** daily, improving transaction speed by **30%**.
- Enhanced operational efficiency by reducing manual entry errors by **40%**.
- Automated key inventory management tasks, leading to a **25% increase** in staff productivity.
